

Andrew Reinking

Quality Assurance Manager | Senior QA Analyst

Fort Wayne, IN Area • 260.301.4186 • reinking.andy@gmail.com • linkedin.com/in/andrew-reinking-a740a9320 • areinking1979.github.io/qa_pf

PROFESSIONAL SUMMARY

Quality Assurance professional with 12+ years of experience leading QA teams, building test strategies, and driving quality across the full software development lifecycle. Proven record establishing QA processes from the ground up, managing testers, and partnering with engineering and business stakeholders to release software with fewer defects. Skilled in manual and API testing, test planning, defect and root-cause analysis, and using AI-assisted tools to accelerate test design. Known for an analytical mindset, strong problem-solving, and meticulous attention to detail.

CORE COMPETENCIES

QA Testing • Manual & API Testing • Functional Testing • Regression Testing • Smoke & Sanity Testing • Exploratory Testing
Test Plan Development • Test Case Design • Test Strategy • Defect Tracking & Reporting • Root-Cause Analysis • Requirements Traceability
Team Leadership • QA Process Improvement • Quality Metrics & KPIs • Training & Development • Stakeholder Communication • SDLC / STLC • Agile

TECHNICAL SKILLS

Tools & Platforms: Azure DevOps (ADO), Postman, Swagger, JMeter, SQL Server, Git/GitHub
Development & Data: SQL, JavaScript, Visual Basic, HTML/CSS, MS Office Suite
Test Automation: Built and deployed a Playwright (JavaScript) automation suite covering end-to-end and API testing, integrated into a GitHub Actions CI pipeline with a live, public test report (see portfolio link above)
AI Tooling: Built custom Claude skills for test strategy development and for generating test cases directly in Azure DevOps

WORK EXPERIENCE

Quality Assurance Analyst01/2026 - 08/2026

Factor AE | Fort Wayne, IN — SaaS provider of software that makes running an architecture & engineering firm simpler, clearer, and easier to manage.

- Served as the company's first dedicated QA professional, establishing QA practices, standards, and testing processes across the organization.
- Operated within an AI-driven SDLC that advanced the development roadmap 2-3 months ahead of schedule, designing QA testing strategies that kept pace with — and safeguarded quality against — the speed of AI-powered development.
- Performed manual and API testing on product updates in test environments, validating functionality before promotion to production.
- Leveraged AI-assisted tools to build test strategies, generate test cases, and investigate issues for both large and small development efforts, accelerating turnaround.
- Partnered with developers to investigate and reproduce issues, supporting faster resolution.
- Reported testing findings, coverage, and release-readiness status to the team.

Quality Assurance Manager2012 - 2024

Intellectual Technology, Inc. (ITI now Neumo) | Fort Wayne, IN — Provider of on-demand software for motor vehicle agencies across the U.S. and Canada, creating efficiencies, reducing fraud, and increasing revenue.

- Led a team of 14 quality testers covering software, hardware, and consumable product testing for the company.
- Developed test plans, test cases, and manual and automated testing strategies that promoted software to production with the fewest possible defects.
- Established team quality and operational-effectiveness metrics/KPIs, reducing testing timelines and improving repeatability across testing cycles.
- Performed exploratory testing and created defect reports and root-cause analyses to prevent recurring issues.
- Identified and planned performance, load, and stress testing needs using testing tools and metrics analysis.
- Designed, built, and maintained a web-based inspection-record tracking system plus multiple Visual Basic desktop applications for in-house record tracking and label printing.
- Ensured accurate product documentation through oversight and staff training; delivered client product demonstrations.
- Advocated for product testability with executives, management, and business partners, driving improved engineering practices and defect prevention.
- Built a positive, productive team culture through clear communication, goal-setting, and performance management.

IT Technician2010 - 2012

Intellectual Technology, Inc. | Fort Wayne, IN

- Performed server hardening, maintenance, data-center installation, and troubleshooting following standard company security processes.
- Set up workstations and user accounts and resolved workstation issues.

Customer Care Representative / IT Technician2009 - 2010

Intellectual Technology, Inc. | Fort Wayne, IN

- Handled client calls, resolved issues, and logged support tickets; performed server maintenance and hardening.

Delivery Associate05/2025 - 01/2026

Troxel Logistics | Fort Wayne, IN — Amazon delivery service partner for the DIN6 Amazon facility.

- Completed assigned Amazon delivery routes on schedule; provided rescue-route support to teammates and resolved route issues with dispatch.

EDUCATION

Bachelor of Science, Information System Security — ITT Technical Institute, Fort Wayne, IN | 2010
Associate of Applied Science, Computer Network Systems — ITT Technical Institute, Fort Wayne, IN | 2008
